The initial physical inspection of all outfall pipes during the mapping process. The initial inspection information collected with the Trimble unit will be transferred to the DEP Illicit Connection Inspection Report Form and each of these forms will be kept with our SPP records. Outfall pipes that are found to have a dry weather flow or evidence of an intermittent non-stormwater flow will be rechecked again to locate the illicit connection. If we are able to locate the illicit connection (and the connection is within the Borough of Lindenwold) we will cite the responsible party for being in violation of our Illicit Connection Ordinance, and we will have the connection eliminated immediately. If, after the appropriate amount of investigation, we are unable to locate the source of the illicit connection, we will submit the Closeout Investigation Form with our Annual Inspection and Recertification. If an illicit connection is found to originate from another public entity, Lindenwold will report the illicit connection to the Department.

Lindenwold uses the police department for reporting spills and illegal dumping. The police department will also be used for reporting illicit connections.
